

## SmartCash Vault™

### Family of Networked and Intelligent Safes

Locations accepting more than \$1,000 cash per day can:

- Tighten cash processes
- Increase security
- Enhance cash flow

SmartCash Vault users tighten cash management processes to reduce shrinkage, and secure cash in an industrialized steel-networked safe.

An added benefit - checks can be scanned and processed through a compact check scanner.

#### Intelligent Safe Technology

Operators feed currency into the bill acceptor and the notes are verified (counterfeits are rejected) by denomination and immediately stored in the safe. All data is electronically journaled and optionally transmitted across a network for enterprise-wide financial reporting. SmartCash Vaults are constructed of high-strength ¼ inch steel with welded corners and can be bolted to the floor. Door access is enabled through a combination of a key lock plus a Personal Identification Number (PIN), enabling a dual control process in concert with an armored carrier.

#### Included with All SmartCash Vaults

- ¼ inch welded steel safe
- Floor bolts
- Dual control door
  - Requires Medeco key plus PIN code for access
- One or two bill acceptors
  - Rejects counterfeit and unfit notes
  - Stores nominally 1,200 notes per acceptor
- Manual drop feature for envelopes
- Thermal printer for transaction journaling
- LCD display with 10-key pad and function keys
  - Interface numeric pad with additional function keys
- Multi-user capability

## SmartCash Vault 2400 Series

The SmartCash Vault 2400 series saves time, boosts productivity, and increases employee security with less cash exposure.

## SmartCash Vault Dispensing Series

The SmartCash Vault 7000 series provides the ultimate level of cash control by limiting cash exposure and providing seamless accounting between the POS and your bank.

### SmartCash Networked Vault Currency Acceptor Series

Ideal for cash-intensive businesses that do not require change fund management.

SmartCash Vault accepts, secures and accurately counts currency. A range of steel safes can operate stand-alone or networked by Burroughs in either a secure wireless network or Ethernet.

SmartCash Vault products contain one or two currency acceptors—each acceptor containing nominally up to 1,200 bank notes. Dual acceptor configurations provide redundancy for one another and double the note capacity, extending periods between armored pickups reducing cost.

Acceptors are also available with bunch note feeders which hold up to 40 notes for automatic feeding into the currency acceptor.

### SmartCash Vault 7000 Series

Offers the combined benefits of cash counting and bill validation with change fund management and an audit trail of all transactions.

SmartCash Vault configurations may be set up to dispense, as well as accept currency. In addition to all of the capabilities of the accept-only safes, the SmartCash Vault 7000 Series dispenses up to 120 rolled tubes in ten denominations. Each tube may contain one roll of coin in any denomination or currency that can be rolled and inserted for future dispense of fixed amounts of change.

Configurations allow for the portion of the safe with acceptors to be under dual control for armored purposes. The dispense side can contain dispensable cash and coins under management control. This enables securing cash with “controlled” withdrawal, plus the ability to “sell” change to a cashier.

### SmartCash Vault 2400 Series Features

#### Structural Features

- 3/8 inch steel plate self-locking vault door
- Three (3) 1-inch chrome-plated locking bolts
  - Drill resistant hard plate and spring-loaded re-locker protection
- Interlocking back flange to prevent hinge attack
- Four (4) floor holes for secure bolt down
- Outside dimensions: 12”W x 20”D x 25 3/4”H
- User-friendly, liquid resistant keypad
- Weight: 165 lb. approx.

#### Technology Features

- Audit trail with over 30 receipts and reports – tracks up to 240 users
- 10 levels of programmable security
- Memory storage up to 10,000 transactions
- High-speed thermal printer
- Wireless network or ethernet
- Single or double locking 1,200 note cassettes
- Single or bulk-note MEI bill validators

### SmartCash Vault 7000 Series Features

#### Structural Features

- 1/2 inch steel plate self locking vault door
- Three (3) 1-inch chrome-plated locking bolts
  - Drill resistant hard plate and spring-loaded re-locker protection
- Interlocking back flange to prevent hinge attack
- Four (4) floor holes for secure bolt down
- Drop drawer dimensions: 5 1/2”W x 9”D x 1”H
- Interior locking compartment dimensions: 11”W x 13”D x 9 3/4”H
- 96 or 120 tube vending capacity
- User-friendly, liquid resistant keypad
- Weight range: 450 - 650 lb. approx.

#### Technology Features

- Audit trail with over 30 receipts and reports – tracks up to 240 users
- 10 levels of programmable security
- Memory storage up to 10,000 transactions
- High-speed thermal printer
- Wireless network or ethernet

#### Optional Features

- Locking 1,200 note cassettes
- Single or bulk-note MEI bill validators

## SmartCash Vault CacheNet High-Volume Currency Acceptor

The SmartCash Vault CacheNet 5000 Series is a heavy duty, back office solution for the most cash intensive businesses.

A full range of SmartCash Vaults are available to meet a variety of secure deposit requirements.

### SmartCash Vault CacheNet 5000 Series

Provides seamless accounting between the POS and your bank with a comprehensive audit trail.

Sites accepting cash between \$50,000 to \$150,000 per day will benefit from the 700 note-per-minute discriminating bill counting ability of the SmartCash Vault CacheNet 5000 series. A secure 5,000 note nominal capacity canister is secured inside the safe under dual control access.

### SmartCash Vault CacheNet 5000 Series Features

#### Structural Features

- ½ inch steel plate self locking vault door
- Three (3) 1-inch chrome-plated locking bolts
  - Drill resistant hard plate and spring-loaded re-locker protection
- Interlocking back flange to prevent hinge attack
- Four (4) floor holes for secure bolt down
- Outside dimensions: 26"W x 25"D x 49 ¾"H
- Envelope drop slot
- User-friendly touchscreen interface
- Weight: 650 lb. approx.

#### Technology Features

- High-speed Cummins Jetscan bill counter
- Locking cassette holds up to 5,000 notes
- Audit trail with numerous receipts and reports
  - Tracking an unlimited number of users
- Multiple levels of programmable security
- High-speed thermal printer
- Wireless network or ethernet

# SmartCash Networked Vault Managed Solution

## Networked Safes with Burroughs Managed Service

SmartCash Vaults are differentiated in the market because of a wireless networking capability communicating to a Burroughs operated data center.

The key difference is Burroughs will make the data available to the stakeholders (the end user management, the bank, and CIT).

The stakeholders have access to data relative to their part of the transaction. Stakeholders are informed as to what data the others can access. This translates into a solution that benefits each individually.

### Installation Services

Burroughs can go on-site, manage a site survey, install a network, install the safe, and bring it on-line.

### Project Management

Burroughs has experience with complex roll-outs of large numbers of products. We can create an offering that enables you to meet any required customer implementation schedule. Complex issues including management of delivery, installation, network procurement and installation, set-up and training across all geographies can be accomplished.

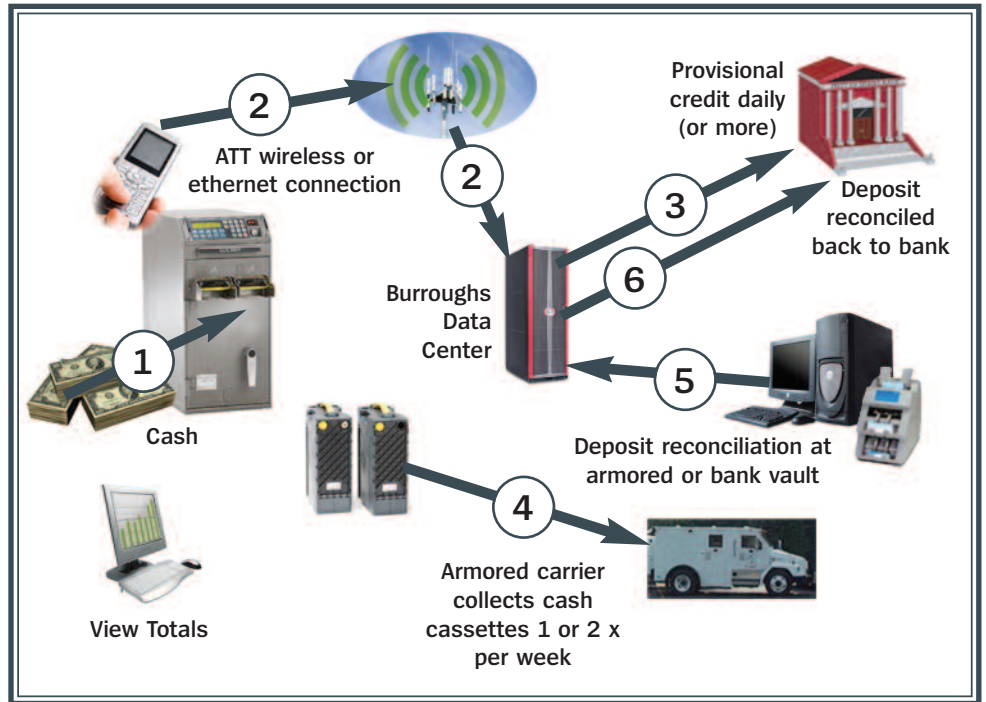

### Training

Burroughs can train clients in any of several ways, including on-site, remote, or custom media such as web-delivered video.

Burroughs Managed Service is an excellent way to close the loop in cash control. By journaling every transaction, all stakeholders (bank, customer, cash-in-transit) have a view of pertinent transactions. At the end of each day, Burroughs will transfer to the client bank, a file of the days transactions in a format the bank can post. The bank can view the database from a browser window.
